

## Lab 5 Questions

1. I learned a lot from this class, like how to make maps using tmap and leaflet. I also liked learning about how to make histograms. What I did not like is the constant errors popping up whenever I try to do a task.
2. For Task 3, I added a layer showcasing the parks in Cuyahoga County. I did that because it was impossible to create a map of all the parks in Northeast Ohio in RStudio, because it did not like large file sizes.
